

TEOAE25

Feature Overview

Interacoustics[®]

leading diagnostic solutions

Automated Screening

The TEOAE25 is typically programmed to return a pass/refer result, but you can adjust the screening parameters according to your own test protocols.

High Performance Probe

The TEOAE25 probe is lightweight with low internal noise. It is small enough to accommodate neonatal ear tips and is quick, easy and inexpensive to clean and maintain.

Comprehensive Printouts

There is a complete overview of results and patient data on a single printout.

Noise Rejection

Recording sensitivity is user controlled. An onscreen feedback mechanism displays recording quality via red and green bars and includes a slider control for setting optimum sensitivity.
