

New diagnostic equipment

INTEREST FREE!

Oticon is pleased to announce:

Oticon customers can now acquire Interacoustics instrumentation through an INTEREST-FREE buying program and can pay for the new equipment by continuing to purchase any and all Oticon hearing devices.

This is a unique opportunity to update and expand your diagnostic instrumentation without the burden of a large cash investment at the front end of your acquisition.

The program is simple:

Choose the equipment you would like to own and contact your Oticon inside account representative or local Interacoustics distributor to sign up for the program. On the back of this page is a price schedule that shows the Interacoustics pricing and the total number of Oticon hearing aids required to pay for that instrument within 24 months. As you purchase those hearing aids, Oticon will add a flat rate of \$50, to each one, interest free while you can take up to 24 months to fulfill your purchase obligations.

Additional finance options:

You can choose to purchase equipment through the traditional Oticon program or by using BES program funds.

**For program details contact your Oticon Inside Account Rep
at (800) 526-3921.**

Affinity^{2.0}

- The professional approach ...

The Affinity is a PC-based modular dispensing tool with unlimited testing protocols and visual counseling tools. With a built-in hearing aid test box, the professional dispenser has options to adjust to the needs of the office.

Choose a combination of audiometry, hearing instrument testing, real ear measurement and visible speech software modules. Flexible Windows based software allows you to customize your test protocols as well as load hearing aid manufacturers test specifications.

For your information about Interacoustics instruments, please visit our website at www.interacoustics-us.com or call (800) 947-6334 for your free product guides.

* Freight, installation and taxes are billed separately and not included in the number of Oticon aids.
